Carrying Rear Passengers

Before carrying passengers, it's important to familiarize yourself with your bike's capabilities by referring to its user manual and/or QuickStart Guide.

- ⚠ **Your bike may behave differently with passengers onboard.**
Practice handling the bike in a safe area before riding with passengers on public roads.

Safety Notes

Follow the Law

- ⚠ **Check your local regulations before carrying passengers:**
 - Some jurisdictions do not allow the carrying of passengers on the back of a bicycle. Others may require specific accessories to do so.
 - Specific laws may apply to the carrying of child passengers on a bicycle.

Know Your Riding Condition

- ⚠ Both front and rear tires must always remain in contact with the ground when riding with passengers. No passenger is allowed when riding on unimproved or unmaintained trails with a natural surface, even if your bike is designed to handle such terrain.

Ensure Your Bike Setup is Safe & Secure

- ⚠ Before each trip, check that accessories have been correctly installed and secured, and ensure there are no loose items on the bike or on your passenger(s) that may get caught in moving bike parts. Keep sharp objects away from children, and suitably cover any coil springs (e.g. under the saddle) to prevent trapping of fingers.

Do NOT Leave Children Unattended

Do not allow your children to climb onto the bike nor leave your children unattended on the bike, even if it is on the kickstand. Wiggling children can upset the balance of the bike and a fall may result in serious injuries.

Use Proper Equipment

- ⚠ **The bike must have the following accessories installed in order to safely transport rear passenger(s):**

- 1. Seating.** Purpose-built rear seating, chosen according to the passenger's needs
- 2. Handhold.** Something for the passenger to hold on to, other than the bike itself
- 3. Foot support.** Fixed platforms or dedicated foot rests on both sides of the bike
- 4. Foot and leg protection.** Something to prevent feet and legs from getting caught in the spinning wheel
- 5. Double kickstand (optional).** Dual-leg kickstand with a wide stance that keeps a bike standing firmly on the ground, providing extra stability when loading and unloading a young passenger

The illustrations above show a mix of suggested gear to safely carry passengers. Your combination of passenger accessories may differ depending on your needs. To learn more about how to safely carry passengers on your bike, visit ternbicycles.com.

Use Accessories Properly

If you're carrying young children on your bike, please follow the instructions provided by your child seat manufacturer for compatibility, installation, usage, and maintenance. To ensure your child's on-board safety, always use the restraint system provided by the manufacturer.

Only use child seats that are designed for your child's age and size. Your child passenger should be able to sit unaided, at least for the duration of the intended cycle journey. Always ensure your growing child's height and/or weight does not exceed the range recommended by the manufacturer.

Tern's seating, handhold, and foot support accessories are designed for use by seated rear passenger(s) only. Using them for unintended purposes such as lifting the bike or carrying substantial weight may cause damage to the bike and/or said accessories.

Follow Your Bike's Max Gross Vehicle Weight Limits

- ⚠ **Check your bike's user manual and/or QuickStart Guide for information about maximum gross vehicle weight* and/or cargo weight** limits. Please do not exceed these weight limits.**

* Maximum gross vehicle weight is the total weight of the bike, riders (the cyclist and any passengers), accessories, and cargo.

** Cargo weight is the total weight of passengers, accessories, and cargo.

Helmet Use

Mandatory helmet use vary across jurisdictions, so make sure to follow your local regulations. For safety, we strongly advise rider and passenger(s) to wear an approved helmet.
